

Annual report on work and implemented projects

YUROM Center for 2024

Based on the Statute of the YUROM Center, we are presenting the 2024 Activity Report to the members of the YUROM Center Assembly and the interested public.

1. In 2024, the YUROM Center was contacted by 287 individuals.
2. We received 153 requests and inquiries for various types of assistance:
 - 48 related to substance abuse issues
 - 23 written complaints concerning discrimination
 - 33 related to children's enrollment in secondary schools
 - 10 related to university enrollment
 - 59 regarding housing issues (legalization, home repairs)

Other visitors had various needs and reasons for coming to the YUROM premises.

Projects implemented in 2024:

1. Project in cooperation with the Slovenian organization ISCOMET Institute:

"Respect for Diversity as a Cornerstone for Roma Integration through Employment – The Case of Slovenia and Serbia – ZAPROM", co-funded by the European Commission – Directorate-General for Justice and Consumers (Grant Agreement No. 848948).

ISCOMET – Institute for Ethnic and Regional Studies, Maribor, Slovenia and YUROM Center: €12,000

2. Project for the prevention of emergency situations in Roma settlements – Donor: UNDP

We have successfully informed the interested public in Serbia, which includes residents of Roma settlements, local governments, competent state authorities, and local self-governments, about the

issues of floods and fires in Roma settlements. Thorough information about the project objectives and purposes has been communicated to the Government of Serbia and the Ministry of Interior, the Sector for Emergency Management, the Coordination Body of the Government of Serbia for the implementation of the Strategy for the social inclusion of Roma, the National Council of Roma, and the 10 local governments in which we implement the project. A key lesson learned is that reminders should regularly be sent to competent authorities about Roma NGOs, who are continuously striving to improve the rights of the Roma and monitor Roma-related issues. Through public awareness created via media and social networks, several Roma NGOs from Serbia, Montenegro, and North Macedonia reached out to us, expressing an eagerness to implement similar activities within their communities.

Project Performance:

A1. Organizing a joint preparatory informational meeting of Roma NGOs from 10 cities with the Sector for Emergency Management (SEM)

The full scope of this activity was realized during the preparation phase when we invited cooperative organizations to join in this project. On February 2, 2024, we organized a meeting at the YUROM centre in Niš, during which we presented the project, along with its detailed objectives, activities, and the roles of the respective organizations from 10 cities. During the gathering in Niš, the most pressing issues in Roma settlements were discussed, and action priorities and methodologies were consequently determined. Upon the recommendation of the organizations present, we accelerated the delivery of fire extinguishers, coordinating pickup and distribution to the settlements on the same day, February 20, 2024. This measure was taken in light of the winter season and reports of fires in Roma settlements.

A2. Determine the program and content of the training.

The program and content for the training and publications were finalized after a meeting with Roma NGOs. The content of the training was developed in cooperation with UNDP and Professor Dr. Martina Zdravkovic.

Following this, representatives from the YUROM Center team, Sanja Stojančić and Nevena Balić, drafted a text proposal and developed an illustration for a publication intended for communication with the public and among Roma activists. The text proposal was further refined in coordination with UNDP, and the

publication was printed in 500 copies on March 12, 2024. This brochure is scheduled for distribution to Roma NGOs on March 25, 2024, coinciding with training event.

A3. Organization and holding of a two-day instructional seminar on emergencies

We have successfully executed the following preparatory measures for the seminar organization: engagement of Roma NGOs pertinent to the topic, allocation of an appropriate venue, and provision of necessary equipment. However, there has been a delay in rolling out the training component due to lengthy procedures within the Sector for Emergency Management, which was intended to provide one of the lecturers. In response to a lack of communication from the SEM, we have engaged Professor Dr. Martina Zdravkovic as a lecturer.

The training is organized on 25-26 March 2024, in Nis, Roma cultural center. Around 15 participants learnt more about civil protection, disaster risk reduction – floods and fires. The training was intended for representatives of civil society, in order to transfer their acquired knowledge and skills to the residents of Roma settlements.

"European Union support for security issues in Roma settlements is of great importance in order to improve the resilience of the most vulnerable categories of the society. Through constant learning about the problems of fires and floods, we raise the awareness of our citizens and reduce the risk of disasters that often lead to fatal outcomes. In the previous period, twelve Roma children lost their lives in disasters, which was a sign to us that we need to talk more with representatives of local self-governments, but also with Roma," said Osman Balić from the Yurom Center.

During the training, Professor Martina Zdravković talked about the functioning of the civil protection system, the normative framework for disaster risk reduction, as well as fire and flood prevention. Participants showed great interest in the discussion, presenting their problems, and suggesting potential solutions.

"It is necessary to educate the residents of Roma settlements to protect themselves, to pay attention to preventive measures, and to know how to react when emergencies occur. In addition, we want the representatives of Roma settlements to be active participants in decision-making related to their safety, to

delegate their representatives to civil protection units and local Emergency Headquarters," emphasized Jelena Marić Luković, Programme Analyst for United Nations Development Programme (UNDP).

Živko Babović, Head of the Risk Management Directorate within the Sector for Emergency Management, also addressed the participants, encouraging them to actively participate in the work of the local Emergency HQ.

One of the conclusions of the training is that it is very important for all community members to be involved in education and preventive activities related to disaster consequences reduction, especially representatives of vulnerable groups, such as residents of Roma settlements. Photos attached.

A4. Signing of a Memorandum of Cooperation between 10 organizations and the Sector for Emergency Management.

We successfully implemented the Memorandum of Cooperation, which was supported by all ten involved Roma organizations. In addition, we have signed individual contracts on business and technical cooperation with each organization. These organizations received financial compensation for their services in the amount of 21,625.45 dinars. The tasks of the organizations were: distribution of brochures - publications about emergency situations in Roma settlements, distribution of fire extinguishers by Roma settlements, training of residents of the settlement (Roma women) in the use of fire extinguishers, provision of sand barrels in the settlement, and public advocacy and discussions with local municipal leadership and emergency situation headquarters to improve the prevention of Roma settlements from emergency situations, as well as lobbying for the co-optation of representatives of the Roma community in emergency situation headquarters.

Unfortunately, despite three attempts and appeals to establish contact and cooperation with the Department for Emergency Situations of the Ministry of Internal Affairs of the Republic of Serbia, we did not succeed. We informed the then President of the Government of Serbia about this, who until a few months ago was the President of the Coordinating Body of the Government of Serbia for the implementation of the state strategy for the inclusion of Roma. If we had succeeded, in the month of February, by the end of May this year, we would have had much greater and more concrete results in terms of construction interventions in the settlements themselves.

A5. Organize a press conference.

The YUROM center has been a project throughout its duration, but even years ago it pointed to the poor position of Roma settlements when it comes to prevention of actions in emergency situations. Media pressure is significant in the process of public representation of this problem. Problems of inclusivity in the practical policy of prevention in emergency situations. We planned a press conference in Nis Media Center. However, on May 21, we had a flood in the municipality of Surdulica and Vladičin Han, where two Roma settlements were flooded. We turned that event into an "open air" press conference on the spot, brought journalists and the media, and that event showed a crucial problem in Roma settlements. Cleaning of the riverbed was organized, which is flooding Roma settlements for the fifth time in the last 8 years. We organized the cleaning of the river bed without the knowledge and participation of the local municipality. This fact and truth says a lot.

Here are links about that event:

<https://www.politika.rs/scc/clanak/616284/U-Vla-di-ci-nom-Ha-nu-po-pla-va-Vranje-pri-prav-no>

<https://jugmedia.rs/u-vladicinom-hanu-proglasena-vanredna-situacija-zbog-poplava-na-terenu-vatrogasci/>

<https://jugpress.com/poplave-u-vladicinom-hanu-opstina-utvrđuje-stetu/>

Furthermore, we have saved money on this activity, and we kindly asked donor to use those savings to buy water ejector pumps.

A6. Prepare and advertise news and events related to emergency situations in Roma settlements on social networks 10 times a month in the next 4 months.

Ever since the onset of the project in January 2024, we have consistently engaged with five prominent Roma Facebook groups: Second Decade of Roma in Serbia, I am a Roma, Association of Roma Students, Roma Media Service, Roma of Serbia, and Roma Culture. Our posts have gained favorable responses and have played a crucial role in spreading awareness about fires in Roma settlements and the unfortunate affected people, including fatalities.

We are committed and are regularly publishing warnings and on-site updates at least once a week on these Facebook groups. The positive feedback indicates that our efforts are appreciated. Notably, our information-sharing on these platforms has also picked up the interest of mainstream media, leading to several appearances on television and radio shows, as well as features in press releases. For your reference, the press clippings are attached.

A7. Notify the Roma newsrooms of the media in public services.

We informed all Roma and local media about the project with prior UNDP approval of all newspaper articles. The reactions were positive. There were 12 reports in the local and national media outlets.

A8. Inform in writing the Coordinating Body of the Government of Serbia for the Implementation of the Strategy for Roma, the Ministry for HMRSD, and for MPALSG.

We took the initiative to inform the Prime Minister about our project through a letter addressed to the Coordination Body of the Government of Serbia for Roma issues. This letter detailed the objectives of our project, its alignment with the state's strategy for Roma issues, its significance, and the reasons for highlighting this topic.

This same information was also dispatched to the Ministry of Human and Minority Right and Social Dialogue (MoHMRSD) and Ministry of Public Administration and Local Self-Government (MPALSG). Thus far, we have only received a telephonic response from the Prime Minister Cabinet.

A9. Inform all Roma organizations about the event and planned activities from the project.

We have extended information related to our project and its implications to approximately 80 Roma organizations throughout Serbia. We conducted dissemination of this information via email.

Feedback received was generally characterized by demands for the implementation of similar projects in other Serbian regions due to the existence of comparable issues. In addition, we reached out to other Roma NGOs in the Balkan region through our Facebook groups (we administer five such groups), which have gained significant popularity. We are pleased to report the organizations in North Macedonia and Montenegro also expressed interest.

A10. Prepared brochure for Roma NGO on emergencies in Roma informal settlements.

From the project's inception, two members of our team have been working on creating a brochure focusing on disaster management (specifically floods and fires) in Roma settlements. This brochure, intended for distribution within Roma settlements, has been optimized and finalized in collaboration with UNDP and EUD. The brochure is designed to be a guide for prevention, and response during occurring fires and floods in Roma settlements.

A11. Printing of the brochure in 500 copies

Our associates Sanja Stojančić and Nevena Balić prepared the brochure, and UNDP approved it. Printing house in Niš, "Medivest" printed out the brochure in 500 copies. On March 25, 2024, we have distributed brochures in Roma settlements through other NGOs.

A12. Distribution of brochures by settlements

Roma non-governmental organizations cooperating from 10 cities distributed brochures to residents of Roma settlements. Distribution was on 03/25/2024.

A13. Get 40 PP devices and distribute 4 pcs. to Roma settlements

We purchased 40 fire extinguishers through a public call for which we received three bids. Prioritizing cost-effectiveness, we opted for the most economical offer from the Voluntary Fire Brigade in Niš, who also undertake the task of filling these appliances.

With the assistance of Roma NGO, we selected 18 Roma settlements in 10 municipalities – Bujanovac, Surdulica, Vlasotince, Leskovac, Doljevac, Niš, Pirot, Svrlijig, Bor, and Prokuplje, and through the Roma organizations active in these municipalities, delivered all procured 40 fire extinguishers on February 2, 2024.

As we received lower offer than expected, the total expenditure for the 40 units amounted to RSD 139,200, leaving an unutilized balance of RSD 71,780 from that budget line 2.3.

A14. Organizing training sessions in 10 cities for 10 inhabitants of each settlement on the use of firefighting devices

Training was organized for the residents of each settlement during the distribution of firefighting equipment. A total of 180 Roma from the settlement were trained. 95 Roma women and young girls from 18 Roma settlements were trained.

A15. Select 5 women in each settlement to be trained in the use of the firefighting device

During the training on the use of firefighting devices, women participated and showed great interest because they are usually at home when fires occur. 95 Roma women and young girls from 18 Roma settlements were trained.

A16. In each of the 10 settlements, provide a rubber hose with a diameter of 1” and a length of 50 meters

Following market research, available hoses, their characteristics, companies, and price range, we purchased 10 rubber hose with a diameter of 1” and a length of 50 meters from Astrum, a manufacturer based in Jagodina, for a total cost of RSD 58,644. Again, we received offer below expected which resulted in the remaining balance of RSD 41,571.50 in the budget line 2.6.

We plan to distribute acquired water hoses to 10 Roma NGOs during the week of March 18-22, 2024. Recipient organizations, which will also receive fire extinguishers and materials for residents of the settlement, are: Roma Cultural Center Niš, Romanipe Leskovac, Humanitarian Center of Roma Bujanovac, Association of Roma Intellectuals Surdulica, Roma Eye Vlasotince, Ternipe Pirot, Gipsy Soul Bor, Prokuplje Roma Association, Svrlijig Roma Association, and Doljevac Roma Association.

A17. Additional activity / Purchase of water ejector pumps

Yurom Center anticipated that there would be savings in the project budget and they kindly requested a revision of the project budget approved by the donor. In May, they faced floods in Roma settlements and recognized the need to acquire pumps for pumping out water. They received three bids, and the most economical bid was chosen. Water pumps were purchased for four municipalities that are at risk of flooding. In addition, a generator-aggregate for electricity was also purchased because a good number of those Roma **settlements do not have electricity.**

3. A project addressing substance abuse among young Roma in Niš was initiated in 2023. The donor is UNOPS. The project had a budget of 1,489,000 RSD and was completed in October 2024.

- Completed strategic media campaign through flyers, posters, videos as well as through TV shows on local TV, Roma FB groups and website
- Forums were held for residents of ten Roma settlements
- Training and opening of the Counselling centre for the prevention of the use of psychoactive substances (PAS) after signing Memorandum of Understanding among City of Niš, YUROM, Institute for Mental Health and Center for Social Welfare
- Regular daily work of the Centre and provision of advisory support to parents of youth who use PAS including monitoring of their further social status as well as provision of therapeutic services
- Initiatives for institutionalisation and sustainability launched. Namely, in agreement with the Working group for the development of an Action Plan for Roma, a project service was successfully included into the Nis City Action Plan for Roma Inclusion for the period 2024 - 2026. The City of Nis allocated RSD 600,000 for its implementation over the next two years which will enable equal access to services for Roma youth and a more efficient response to their needs.

Medias about our activities in 2024.
